## Overview:

Anoha Well Delivery Services is an emerging partner for Oil & Gas operators, offering integrated, end-to-end well lifecycle solutions. As a newly established company, founded in 2026 and headquartered in Dubai, UAE, we are built on a foundation of industry expertise, modern practices, and a commitment to delivering efficient and reliable operations.

We combine specialized equipment, technical knowledge, project management capabilities, and skilled personnel to support drilling, intervention, and production activities in a safe and cost-effective manner.

Anoha focuses on onshore projects, providing drilling management, well intervention support, engineering services, and manpower solutions, all aligned with strong HSE standards and regulatory compliance.

Founded  
2026

Headquarters  
Dubai, UAE

Nature of Business:

- > Full-service well delivery
- > Engineering
- > Consulting
- > Manpower solutions
- > Oil & Gas sector

## Our Vision

To be the preferred partner for Oil & Gas operators, recognized for integrated solutions, technical expertise, and innovation.

## Our Mission

Deliver reliable and integrated well delivery solutions with a strong focus on safety, quality, efficiency, and continuous improvement.

## Core Values

Safety First

Integrity

Excellence

Collaboration

Innovation

Reliability

# Unique Selling Proposition (USP)

---

## **Integrated & Turnkey Solutions**

We provide full well lifecycle services, combining drilling, intervention, consulting, project management, and manpower under a single accountable partner from

## **Technical Expertise & Skilled Workforce**

Our team of engineers, field specialists, and operational personnel brings deep expertise in drilling, well intervention, reservoir management, and project execution, ensuring every project is delivered with precision.

## **Reliable Supply Chain & Equipment Provision**

We manage end-to-end procurement, inspection, expediting, and logistics, alongside provision of specialized drilling equipment, tools, and support services, ensuring projects stay on time and within budget.

## **Drilling and Workover Management System (DWMS)**

Our proprietary DMS standardizes well construction, improving safety, performance, quality, and cost efficiency across drilling campaigns.

## **HSE & Compliance Excellence**

Robust health, safety, and environmental programs, combined with regulatory compliance, safeguard people, assets, and operations.

## Products & Services / Business Offerings

### 1. Well Delivery Services:

- ✦ **Drilling Services:** Provision of specialized equipment, tools, and services for new well construction
- ✦ **Well Intervention & Workover:** Execution of interventions, recompletion, stimulation and production enhancement operations to optimize well performance.
- ✦ **Drilling and Workover Management System (DWMS):** Establish a structured governance framework that strengthens client oversight while enabling wells to be executed under clear technical standards and internationally recognized engineering practices, providing standardized well construction, and improving safety, performance, quality, and cost efficiency.

### 2. Integrated & Turnkey Project Management

- ✦ **End-to-End Delivery:** Planning, procurement, logistics, and contractor management.
- ✦ **Governance & Controls:** HSE, quality, cost, and risk management.
- ✦ **Performance Optimization:** Monitoring and reporting for operational excellence.

### 3. Petro-Technical Consulting & Engineering

- ✦ Subsurface studies, reservoir management, and operational audits.
  - ✦ Technical support for drilling, completion, and production operations.
- 

### 4. Outsourcing & Manpower Solutions

- ✦ Managed services and DWMS implementation and operational support.
  - ✦ Recruitment, mobilization, and personnel management for specialized operations.
- 

### 5. Procurement & Supply Chain Management

- ✦ Procurement, sourcing, expediting, inspection, and logistics to ensure reliable delivery of goods and services.
- 

### 6. HSE, Quality & Compliance

- ✦ Operational safety programs
- ✦ Quality assurance, inspections, and regulatory compliance

## Industry Expertise & Capabilities

---

Onshore and offshore operations

Technical skills: Drilling engineering, reservoir management, well intervention

Technology: DWMS, monitoring systems, project management tools

Proven ability to deliver complex projects safely and efficiently

Connect with us to explore how **Anoha Well Delivery Services** can optimize your well operations with safe, reliable, and high-performance solutions.
